

# SAM Challenge - Thankfulness - St Silas Academy

## Phase 2 Years 4-6 Thankfulness

### Home

Find out what is happening to the bee population in Great Britain and what will happen if we don't look after our bees. Research how we can help bees and what to do if we find one on the floor. Design a poster or set of instructions of how and why we should look after them. Look at websites such as [www.saveourbees.org.uk](http://www.saveourbees.org.uk)

Research organisations which help families in need, such as NSPCC. How does their work help others? Create a poster or presentation.

Find out about who the charity Nightsafe helps. How can their work help us to be thankful for our lives and our families?

Make a list or a poster showing 5 things in your life that you are thankful for and say why you are especially thankful for these things.

Look at some food packaging at your house. How can you reduce the amount of packaging you and your family buy? Write a letter to a local shop asking them how they intend to reduce their use of single use plastics.

### Wider Community

Find out about local festivals/events in your town, such as the Festival of Light Parade, Bonfire Night and firework displays, Believe in Blackburn. Design a poster to advertise the festival/event.

Find out about two property protection schemes, such as the Neighbourhood Watch Scheme or Home Watch Scheme. Draw the sign used to show where these schemes are happening. Show how property-marking schemes that use your postcode can work. Know how to keep your possessions safe when you are out and about.
